EXPERIENCE

May 2026	Ministère de l'Intérieur — Data Engineer	Paris, FR
Aug. 2026	<i>Context:</i> The French Ministry of the Interior is a central institution of the French government, responsible for internal security, territorial administration, and local governance. Design and implementation of a Data Lakehouse architecture to centralize, structure, and leverage the ministry's data assets. • Design of the Data Lakehouse architecture (bronze, silver, gold layers) • Data ingestion and transformation from heterogeneous sources • Data pipeline orchestration • Implementation of data governance and data catalog • Query and storage performance optimization • Creation of analytical dashboards for business units	
Sept. 2025	Waiyer — Freelance	Paris, FR
May 2026	<i>Context:</i> Waiyer is a digital company specialized in data and cloud architecture. Waiyer optimizes data management through custom solutions using the latest technologies. • Implementation of data architecture and pipeline orchestration. • Software engineering: development of scripts, APIs, and automation tools. • Functional vision: requirement definition, KPIs, and tailored dashboards. • Tech monitoring: tracking data trends and identifying innovation opportunities. <i>Skills:</i> Kubernetes · Github Actions · Python · AWS S3 · SQL · MongoDB · PostgreSQL · PowerBI · Flutter · Go · Typescript · gRPC · Redis	
Apr. 2025	SFEIR — Data Architect for LCL	Villejuif, FR
Sept. 2025	<i>Context:</i> <u>LCL</u> (Le Crédit Lyonnais) is a major French bank. Optimized internal organization for the SNI entity and implemented analytical dashboards for the Executive Committee. • Audit of existing IT systems: stack analysis (PostgreSQL, MongoDB, Teradata). • Hybrid technical architecture (On-premise first vs Cloud GCP proposals). • Kubernetes orchestration of dockerized Python scripts. • Storage via PostgreSQL (analytical mode) and S3. • Data schema design (tables, columns, indexes). • Selection of Python libraries (pandas, SQLAlchemy) and Jira API integration. • Dataviz: dynamic Power BI dashboards for the Executive Committee. • Technical leadership: mentoring 2 data engineers and 1 PO, implementation support. • Best practices and centralized documentation in Confluence. <i>Skills:</i> Kubernetes · GCP · GitLab CI/CD · Python · AWS S3 · SQL · MongoDB · PostgreSQL · Teradata · PowerBI · Elastic Stack (ELK)	
Mar. 2025	SFEIR — Data Consultant	Neuilly, FR
Sept. 2025	<i>Context:</i> SFEIR is a leading Google Cloud Platform (GCP) partner. In charge of technical recruitment for: Data Engineers, Data Scientists, ML Ops, DevOps, and Fullstack profiles. <i>Skills:</i> GCP (Google Cloud Platform)	

Jan. 2023 — Jan. 2025	Visian — Data Consultant for Engie Paris, FR <i>Context:</i> Engie is a global energy leader. Data Engineer within an agile team (SAFe) developing "Mon Bonus Engie", ICE, and "Ecogestes Dynamiques" products. • Mon Bonus Engie: energy efficiency reward service (300k clients). • ICE (Impact Carbone Elec): future carbon consumption analysis (1M clients). • Ecogestes Dynamiques: explaining household electrical object impacts (1M clients). Missions • Product implementation and large-scale data management (DBs, flow orchestration). • Technical and functional KPI development. • Monitoring and Alerting solutions. • REST API creation (100k calls/day, latency < 1s). • AWS micro-services and digital platform architecture participation. • Performance optimizations (memory, execution time, refactoring, indexing). • Automated reporting via SNS and GitLab CICD. • Scaling Deep Learning algorithms (DeepAR, Temporal Fusion Transformer). <i>Skills:</i> c3ai · JavaScript · Jenkins · AWS Lambda · Kinesis · Databricks · Python · Terraform · CloudWatch · MLflow · DynamoDB · Airflow · SQS · SNS
Jan. 2023 — Jan. 2025	Visian — Data Consultant La Défense, FR <i>Context:</i> Data consulting firm specialized in large-scale data projects. • Recruitment of technical profiles (Data Engineers, Scientists, DevOps). • Direction of the Pysquad project (internal digital projects). • Coordination of Generative AI projects using Azure AI Studio. • Creation of a data platform to assist sales teams with prospect and consultant data. <i>Skills:</i> Docker · Azure AI Studio · Django · Streamlit · PowerBI · FastAPI · Redis · AWS Code Artifacts
Aug. 2021 — Oct. 2022	Aqua Digital Rising — Lead Data Scientist Paris, FR <i>Context:</i> Fintech startup aiming to revolutionize sports betting through data. • Storage management (MongoDB, SQL Server, HDF5) and Python flow structuring. • High-performance REST API with Redis caching and RabbitMQ live updates. • ML algorithms (clustering) and statistical analysis for players and teams. • Azure service configuration (Functions, Web Services, Pipelines, Keyvault). • Team coordination: leading 1 Data Scientist and 1 Front-end Developer. <i>Skills:</i> SQL Server · Scikit-learn · Redis · JIRA · RabbitMQ · InfluxDB · Bash · MongoDB · Microsoft Azure
Feb. 2021 — July 2021	Orange Business — Data Scientist Paris, FR • Diagnostics of VoIP network anomalies using Machine Learning (clustering). • Creation of dynamic VoIP network graphs with Kibana and Neo4J. • DevOps metric analysis of Elastic server clusters. • Log cleanup automation using log4j and Bash. <i>Skills:</i> HTML · Scikit-learn · ELK · CSS · Python · Neo4j · JavaScript · Bash
Aug. 2020 — Mar. 2021	Digiberries — Software Engineer Paris, FR • Automation of Excel report generation from Google Ads data. • SEO analysis tool and automated PDF report generation (Lighthouse, NodeJS). • Email automation scripts. <i>Skills:</i> Lighthouse · Python · Google Ads · Node.js
Apr. 2020 — Aug. 2020	Eudonet CRM — Data Scientist Courbevoie, FR • Elastic Stack (ELK + Filebeat) implementation for Windows IIS log analysis. • Python algorithm for client churn/usage drop detection (FBProphet). • Dynamic web platform (Node.js) for result visualization. • PowerBI dashboards for project management and PowerShell IIS scripts. <i>Skills:</i> SQL Server · PowerShell · ELK · Python · Power BI · JavaScript · Bash
July 2019 — Sept. 2019	Veesion — Software Engineer Paris, FR • Built an internal video labeling and visualization platform with Django. • Data classification for computer vision model training. <i>Skills:</i> HTML · CSS · Python · JavaScript · Amazon S3 · Django

PERSONAL PROJECTS

- **Artificial Intelligence:** Automated multimodal digital content creation.
- **Finance:** Financial analysis algorithms and visualization tools (Python).
- **Sorting Algorithms:** Algorithm visualization platform (React).
- **NLP:** Chatbot displaying song lyrics (Messenger Chatbot).
- **Computer Vision:** Hand gesture to equation transformation (Tensorflow, OpenCV).
- **Deep Learning:** Healthy recipe scoring algorithm (Tensorflow).

CERTIFICATIONS

2025 GCP - Associate Cloud Engineer / Professional Data Engineer

EDUCATION

Sept. 2018 **ESILV (Engineering School)** Courbevoie, FR.

June 2021

- Master's in Computer Science, Big Data & IoT - Specialization in Data Science.

Sept. 2019 UC Riverside (Exchange) Riverside, CA, USA

Jan. 2020

- Data Mining (CS 235), Machine Learning (CS 171), Python Programming (CS 009).

Sept. 2016 CPGE Fénelon Sainte-Marie Paris, FR

Dec. 2018

- Pre-engineering intensive program in Mathematics and Physics (MPSI / MP).
